Remote work +923426386433 Based in Pakistan

Profile

Motivated Python developer with a strong foundation in electrical engineering, problem-solving, and building intelligent, AI-powered solutions. Experienced in remote collaboration, clean code, and transforming ideas into functional applications. Passionate about creating tools that serve real-world needs.

Skills

Programming: Python, HTML, CSS, JavaScript, LaTeX
Libraries/Tools: NumPy, Pandas, Flask, OpenAI API, Git
Languages: English (Fluent), Urdu (Native)
Soft Skills: Analytical Thinking, Remote Collaboration

Education

BS Electrical Engineering *In Progress*
National University of Science and Technology (NUST), Pakistan

Projects

AI Bible App (Full-stack) — Web app that summarizes the Bible and generates AI-powered scenes. Clean dark UI with multilingual support.

Python Quiz Generator — Dynamically creates quizzes using NLP and auto-grading logic in Python.

CLI Text Summarizer — A terminal tool that uses OpenAI API to summarize long content into bite-sized summaries.

Remote Script Suite — Python scripts automating file parsing, organization, and API tasks with modular design.

Achievements

- Led AI content calendar project for Bible video generation.
- Designed professional dark-themed UIs in HTML/CSS.
- Built multilingual features in personal web apps.

Interests

Creative Coding
Faith-Based Tech
Digital Evangelism
Clean UI Design
